## Elimetal Inc. Experiences Continual Growth

*Elimetal gains exclusive rights to produce pump and engine control systems*

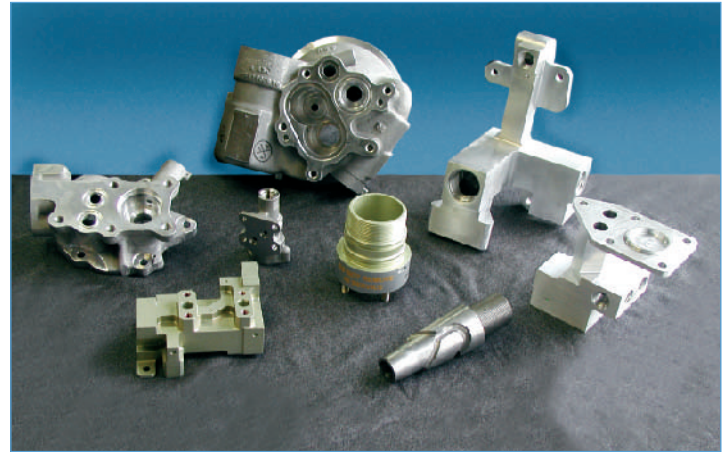

Montreal, September 1, 2005 - In October 2004, once again, Elimetal expanded its core capabilities with the signing of a new agreement, giving us exclusive rights to mass produce high tolerance aircraft components for the Defense and Aerospace industries. These parts include pump & engine control systems used primarily on Pratt & Whitney engines, thus solidifying our expertise in this field.

The introduction of these new aircraft components, required Elimetal to acquire additional

capabilities including:

- Cylindrical internal grinding
- Cylindrical external grinding
- Honing
- Match grinding
- Lapping
- Brazing
- Pressure and Leakage testing
- Precision assembly work

In order to perform the above capabilities and fulfill the production requirements of these high tolerance components, advanced machinery and technology was acquired. At our St. Laurent facilities, we are

*A selection of components produced with Elimetal's Advanced Machinery*

presently capable of maintaining tolerances of +/- .0001 with the

use of our newly added manufacturing processes.

## Elimetal Inc. Acquires Additional 4-axis Horizontal CNC Production Capabilities

*Elimetal begins production of wireless military communication components utilizing new Mazak PFH-5800*

*Elimetal's new Mazak PFH-5800*

Seeing the ever-growing need for multi-axis parts, in September 2005 Elimetal purchased a new Mazak PFH-5800, enabling us to provide 4-axis horizontal milling for high volume production. We are now capable of machining parts 32.0" in diameter x 40.0" in high. This recent acquisition has enabled Elimetal, to successfully mass-produce high-precision components for its customers.

Everything from CNC Manufacturing and EDM capabilities, to assembly and testing is now being performed in-house. Elimetal has now become a one-stop-shop for all our customers' manufacturing needs, by delivering full, turnkey solutions. Having such a versatile and broad spectrum of manufacturing capabilities, we are committed to continue our expansion and growth by

always being on the leading edge of technology in the Aerospace, Military, as well as other hi-tech business sectors.

*An ISO 9001-2000 Certified Company*
